

basalto

In Rome architects and engineers selected Basalto to create the Theatre and pave the streets.

They prized the rich range of charcoal grey to black colorization of this unique material along with its incredible density. Basalto is found on the terrestrial planets (those closest to the sun) of Earth, Mercury, Venus and Mars! Our unique symphony of Basalto is offered in three irresistible finishes; honed, chiseled and bush hammered. There are a variety of field and mosaic blend options to choose from; elongated hexagons to a multi finish staggered.
